

Initial-meeting-notes - Emily & Santiago Star Wars Website

Sections from the Wikipedia page to include

Premise

List of films and television shows

Characters

Fictional timeline

- Imagining it being an interactive diagram

- Horizontal scroll

Interactive map

Themes

Cultural impact

Accent colors:

White on dark background, yellow highlights,

Tatooine, Hoth, Endor, Coruscant, Mustafar, Kamino

Design choices

- Incorporate the intro long scrolling thing somewhere in the site, maybe make the premise that

- Font should feel Star Wars themed

- Feel modern

- Sans-serif

- White text on a darker background, yellow accent color

- Red and light blue for light sabers would be interesting too

- Old TV screen feel

- Pixelation?

- Incorporate map of galaxy somewhere that you can interact with (see creative brief)

- Make it so that when you hover over certain notable planets, it highlights and you can see more information about that planet in a popup

- <https://screenrant.com/star-wars-original-trilogy-planets-explained/>

- Don't need to know where they are exactly, just estimate

- Definitely incorporate light sabers into the website

- Bad guys have red colored

- Good ppl tend to have green or blue

- Other elements to include: spaceships (like Millennium Falcon)
- One smooth-scrolling page
- <https://landonorris.com/>
- Make it like the Apple website where it's very visual
